The Siebold Company Inc. (TSC) announces the acquisition of

LION WEB COMPONENTS, INC.

April 26, 2019 Harrisburg, Pennsylvania

The Siebold Company (TSC) is pleased to announce the acquisition of Illinois-based web offset printing press parts supplier **Lion Web Components, Inc.** The purchase is aligned with TSC's parts expansion strategy to better serve their global base of Goss™ and DGM parts customers. TSC's VP of Corporate Development, Christopher Miles commented, *"Following our three recent acquisitions, DR Press Equipment, Dauphin Graphic Machines (DGM) and Smith Pressroom Products, acquiring Lion Web further strengthens our customer support for our Goss™ and DGM press customers."* All parts will be inventoried at TSC's Harrisburg, PA facility.

The acquisition of Lion Web has added significant single-width Goss, DGM, Hantscho and Harris press parts inventory at TSC's Harrisburg PA Technology Center, allowing TSC to ship most parts orders the same day they are placed.

"We've migrated the Lion Web parts inventory, services and telephone lines into our Harrisburg facility, and the Lion website into our new www.sieboldparts.com website. We are well prepared to accommodate all Lion Web customers", stated TSC VP of Parts, Service and Product Development, Eugene Albright. *"Through this acquisition of Lion Web, we have also added parts inventory for Hantscho™ and Harris™ press equipment."*

TSC has completed over 5,000 successful equipment installation projects since 1989 throughout North America and the English-speaking Caribbean Islands and specializes in the newspaper printing, commercial printing and material handling industries. TSC is the parent company of *Lion Web Components, DR Press Equipment, DGM and Smith Pressroom Products* and offers press equipment brokering services, equipment reconfiguring & reconditioning services, equipment audits & appraisals, and operational consulting. For additional Goss and DGM parts and service information, please visit www.sieboldparts.com or call 800-452-9481.
